EXPERIENCE

Meural @ NETGEAR, New York

Senior Software Engineer, APRIL 2020 - MAY 2023

Software Engineer, SEPTEMBER 2017 - APRIL 2020

- Full-stack lead of my.meural.com web (Next.js) and RESTful APIs (Django) consumed by web/iOS/Android
- Led the accounts and payments dev integration between Meural and NETGEAR post acquisition in 2018
- Implemented E2E flow of NFT wallet integration feature on both web and iOS app to retrieve NFTs via third party APIs (OpenSea/Alchemy) to display on the canvas
- Collaborated with DevOps team to maintain a stable production environment for tens of thousands of users with AWS and Docker infrastructure, along with automatic CI/CD using CircleCI
- Contributed to the IoT system between the canvas and the cloud, the canvas software (UI and backend) and packaged the canvas firmware (i.e kernel)
- Optimized DB queries and utilized caching to increase scalability and minimize request times for a better UX
- Launched NPIs and helped increase sales/revenue via a marketplace for subscription (>70% retention rate) and artworks available for purchase in 30+ international countries
- Implemented asynchronous job queue with Celery to schedule future tasks in the background
- Onboarded new team members, reviewed code daily and collaborated with UX designers using Figma
- Built and maintained internal tools: 1) CMS web app for our curators to be able to categorize, tag and manage 10000+ artwork collections 2) Support web app for our support team to view data and perform necessary actions to resolve customer issues
- Supported weekly customer support tickets
- Worked with our content and marketing team for artwork launches by region (i.e implemented content geo-restriction by IP address)
- Integrated with Stripe and Shopify for payments and orders for our sales platform prior to NETGEAR acquisition

SKILLS

Python, Django, Django Rest Framework, JavaScript, React.js, Redux, Next.js, Ruby, Rails, SQL, Docker, Elasticsearch, RabbitMQ, Celery, AWS, ECS, EC2, CakePHP, Jest, Enzyme, RSpec, Git, HTML, CSS, Segment, Sentry, Mixpanel, Stripe, Shopify, Airship, AppDynamics, Jira, Agile, Scrum, Kanban

EDUCATION

App Academy - 12 week full stack web dev bootcamp with < 5% acceptance rate

MAY 2017

- Topics: Rails, JS, SQL, React, TDD, scalability, algorithms, OOP, single-page apps

Carnegie Mellon University - BS in Biological Sciences and Psychology

MAY 2016 • GPA: 3.82

- Courses: Principles of Computing (Ruby), Fundamentals of Programming (Python)
